

Maintenance update for July 2017

Sorry for the late posting been very busy here at home.

Sandy has been cutting the grass on the dams and in the parks

We started to widen North airpark rd. it's looking good just have to add some road gravel but first we have to remove some more sand in the road so it does not become a mud pit. This is this month's project.

Next area will be south airpark but will need some surveys done.

We replace one coverts that have been in for over 15 years that I know of.

The one replaced is on Windoga dr

Two were installed incorrectly. And one we need to get a survey done so there is no problems.

We have the covet to replace to one on south airpark rd. by Donnies place.

Our tractor is running well no problems.

Jerry and I have been working on keeping the brush pushed back along Windoga dr by the ball diamond.
